ARC RATED EXTREME

KEVLAR®/NOMEX® HARNESS

Arc Rated Extreme
Kevlar®/Nomex® Harness
603N3Q5

The Buck Arc Rated Extreme Harness™ is constructed of Nomex®/Kevlar® webbing that has a nearly 800-degree char temperature. Unlike other Kevlar® harnesses, this webbing is less abrasive and softer to the touch, which makes it perfect for those working long days in the bucket. Originally developed exclusively as a bucket truck harness for one of the largest electric utilities in the country, the Buck Arc Rated Extreme Harness™ is now available to the public!
Buckingham's Arc Rated Extreme Harness™ is an 'X' style full body harness that has a U-shaped design that spreads the opening around the neck to eliminate the irritation of webbing against the neck. ***Meets/exceeds ASTM ARC Performance Requirements and ANSI Z359.***

FEATURES:

- Constructed of Nomex®/Kevlar® webbing and has a nearly 800-degree char temperature.
- Interlocking 9KV rated dielectric hardware.
- Kevlar® wrapped web loop dorsal and sternal attachment points.
- Lanyard parking attachment.
- Dual suspension trauma straps.
- Easy vertical length adjustments.

Rated to 420 lbs. when used with equivalently rated accessories.
Available in S, M, L or XL.
