

# SEMI FLOAT BUCK MOBILITY BELT

## SEMI FLOAT BUCK MOBILITY BELT 190224

With the advent of wood pole fall restriction, the need to have a four dee ring belt to accompany the primary (EZ Squeeze™ and SuperSqueeze™) and the secondary (BuckAdjuster™) for transitioning over obstruction is made easier with two sets of dee rings. The wider Semi Float Buck Mobility Belt

accommodates two sets of dee rings, providing additional support. With a higher mounted waist strap, the Semi Float Buck Mobility Belt eliminates interference to the user's leg caused by lower waists on traditional belts.
