

BUCK SELF RESCUE

A BUCKET EVACUATION SELF RESCUE SYSTEM

Two Rappelling Straps

To be used with 'H' style harnesses

Weather Resistant Bag

Material withstands 40cal/cm2 electric arc exposure

TVAC Descent Line

6.8mm descent line that stands up to heat on long descents

Aluminum Descender

Anti panic release brake stops the descender if the user releases or compresses the descender all the way

Self Rescue System

301SRK-50

The 301SRK-50 has all the benefits of the lightweight and compact 301SR, but with a bag manufactured out of material that will stand up to an electric arc flash, protecting the critical components packed inside.

Unit features a lightweight, compact design, and a lightweight descender

manufactured from aircraft grade aluminum. The anti panic release brake stops the descender if the user releases or compresses the descender all the way. The 6.8mm TVAC descent line stands up to heat on long descents. Includes two rappelling straps to be used with 'H' style harnesses. The entire system

is conveniently packed in a weather resistant bag that will stand up to an electric arc flash. Single man rescue rated to 310lbs. Two man rescue rated up to 440lbs. Meets ANSI Z359.4 requirements.

***Bag Material withstands 40cal/cm2 electric arc exposure.**
