

# BUCK BATTERY HOIST

A LIGHTWEIGHT AND EASY TO INSTALL BATTERY HOIST SYSTEM!

## Buck Battery Hoist 5100W

The first safe & OSHA compliant way to remove & replace batteries in aerial CATV battery cabinets! The Battery Hoist eliminates the user from needing to handle batteries when ascending and descending on ladders or in a bucket and minimizes potential for accidents. With the use of the winch and the battery hoist webbing, users can easily raise and lower batteries.

This product allows the user to lift the battery with a worm gear versus a traditional hoist via a battery-operated drill, or the winch handle that comes with the system.

### Includes:

- Durable hook for attaching to the battery carrier.
- Battery strap/carrier.
- Ratchet system for securing hoist in place.
- Ladder stabilization strap for securing your ladder.
- Removable winch handle.
- Storage bag.
