

BUCKOHM™

CONFINED SPACE HARNESS

BuckOhm™ Confined Space Harness 68M9EQ2

The BuckOhm™ Confined Space Harness is an H-style full body harness that features all-dielectric hardware. This harness also features 5 reflective rescue loops that can be used to perform a safer and more effective rescue. This full-body harness was developed to be used in conjunction with Buck's Manhole rescue lifeline kits (105Q1-30 or 105Q2-30) and Confined space retrieval (5003) systems.

Features:

- 9KV dielectric hardware. *Chest D-Ring rated at 3KV.
- Lightweight, comfortable, breathable and most importantly, functional back pad.
- Dorsal web loop for lanyard connection.
- Quick Connect legs straps for easy donning.
- 5 Reflective rescue loops.
- Back/shoulder pad provides comfort and ease when donning.
- Harness comes w/an energy-absorbing lanyard breakaway attachment (ensure ANSI compliance if removing back pad) & leg strap retainers to use if needed.
