Bucket Hooks w/Tether Hole

Buckingham's patent-pending bucket hooks can fit up to a 2 1/2" bucket lip and now features a tool tether connection eye. The tether connection eye allows for a tool tether to be attached for extra tool fall protection.

Features:

- An outside hook with a 2 1/2" hook opening and a 40 lb. WLL (3:1 safety factor).
- Two inside accessory hooks with a 15 lb. WLL (3:1 safety factor).
- A 3/4" inside opening.
- The duo hooks on the inside are great for storing extra slings, blocks, tools, etc.

Tether Connection Eye is rated as an ANSI 121 Anchor Attachment, when properly attached to the bucket and when used with an ANSI 121 rated tool tether.
