

# BUCK ARBORIST ALUMINUM RINGS

300A

200A

100A

## Arborist Aluminum Rings

Buckingham Arborist Rings are manufactured from a high-quality Aluminum Alloy and then anodized to create a smooth finish to provide an effortless rope pull. These multifunctional rings are designed to be used with a wide variety of arborist equipment such as friction savers, connection points, arborist saddles with rope or webbing suspension bridges, etc. All rings have a minimum breaking strength (MBS) of 5,000 lbf. (23 kN) in all directions

- The 100A Ring (small) features a 1-1/8" eye and is rated to 5,000 lbf/23 kN.
- The 200A Ring (large) features a 1-7/8" eye and is rated to 5,000 lbf/23 kN.
- The 300A Ring (X-Large) features a 2-1/2" eye and is rated to 5,000 lbf/23 kN.
