

# THE TREEZSQUEEZE™

FOR FALL RESTRAINT WORK WHILE POSITIONED IN A TREE

The easiest, most functional, and only engineered/proven Choking Lanyard System on the market.

## Patented WebGrab™

With BuckHorn™  
Adjustment Lever

## Serrated Roto Snap

With a welded  
steel ring

## Friction Hitch Cord

32" Eye-to-Eye  
Prusik

## Permanently Attached Cleat

## Hitch Climber Pulley

## Outer Strap w/loop Handle

Handle promotes  
a more natural  
climbing motion

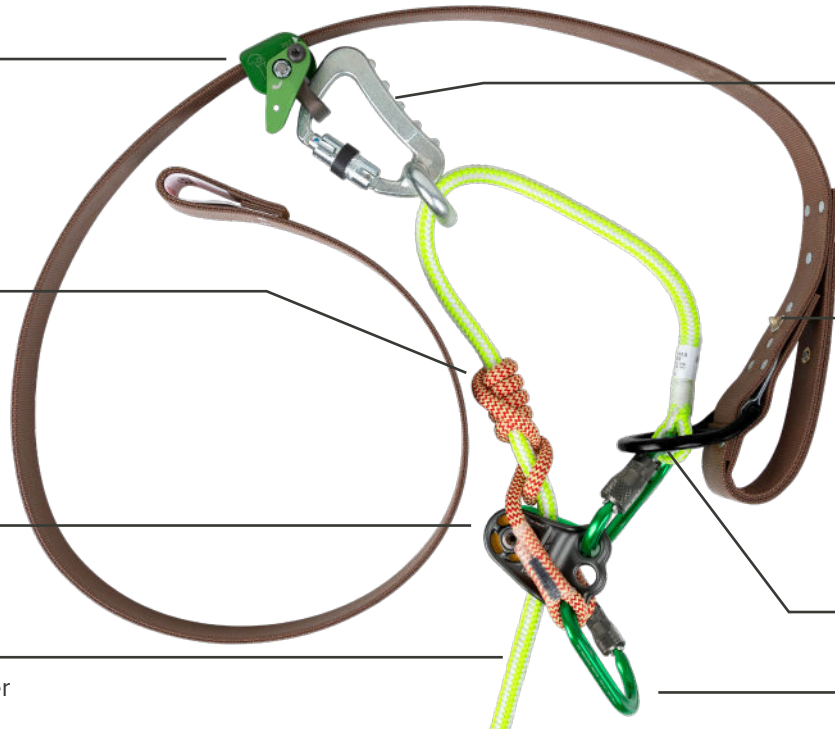

## Integrated Climbing Line

½" 16 Strand Tuefelberger  
Arbor Elite Rope

## Bent Aluminum D-Ring

## Aluminum Carabiners

Gate rated: 3,600 lb.

## The TreEZSqueeze™ 590LR1-120

Introducing the new TreEZSqueeze™, the best option in the tree care industry for fall restraint work while positioned in a tree. The TreEZSqueeze™ is the tree care industry's first Engineered System, tested, and proven to help prevent falls in the event of a gaff out while working on a spar.

### Features:

- Easy one-handed outer strap adjustment using Buckingham's patented WebGrab™ with the new BuckHorn™ Adjustment Lever.
- Easy inner rope length adjustments for different spar diameters.
- Hitch Climber Pulley.
- 32" eye-to-eye prusik: 10 mm Tuefelberger Ocean Polyester Hitch Cord.
- 3,600 lb. gate rated aluminum carabiners.
- Bent aluminum D-ring.
- Newly positioned handle to promote a more natural and ergonomic climbing motion that is also reinforced for more rigidity.
- Serrated roto snap with a welded steel ring.
- Outer impregnated nylon strap.
- Inner climbing rope: ½" 16 Strand Tuefelberger Arbor Elite Rope.
- Available in numerous lengths of climbing line and outer straps.

### Tested and proven via the ASTM F887 standard

*The only certified and engineered system in the Tree Care industry that has been tested and designed to meet the stringent ASTM F887 standards that require rigorous testing to prove and certify the system will help prevent and mitigate the risk of a fall with proper use & training of the product.*

# THE TREEZSQUEEZE™ CLIMBING LINE SYSTEM

Used for capturing system, length adjustment for cinching the TreEZSqueeze™ around tree for proper fit. Also gives the user's ability for fast, safe, and easy descent on climbing line if needed.

## A. Minimum/Required 4-Wrap/4-Coil:

- VT [VALDOTAIN TRESSE] or DISTEL friction hitch only.

## B. Pulley:

- Used to help tend the system and for easier length adjustments and provide central attachment points.

## C. High Strength Aluminum 3,600 lbf. Gate Carabiners:

- For tying climbing line system into central connection points at pulley and for connection at saddle/harness.
- Triple Action Gates.

## D. Climbing Line (Rope):

- Extremely durable and heat resistant prusik cord and Climbing Line designed and engineered to last and withstand high heat situations for use on rope descent.
