

**PN 65-10 SUPERBASE ANCHOR REFERENCE SHEET**  
**7/12/22**

The PN 65-10 SuperBase Anchor (10 ft. long) was developed with ArborMaster. This Basal / Base anchor is used for anchoring an Arborist's climbing line at the base of the tree. It can be set up in multiple configurations, see below. Setting up the anchor at the base of the tree also allows the climber to rig for rescue, allowing for a ground-based rescue in the event of an emergency.

**1. Figure 8 on a bite stopper knot configuration.**

**2. Spliced EYE Capture configuration.**
