ONLY 3.1 lbs.!

Buck Featherweight Harness w/Anti Chafe Technology™ & Dielectric Hardware 68L98Q1

Nothing can make a workday worse than a heavy harness and chafing, especially in or around the neck area. While many harness shoulder pads on the market seem to increase irritability and chafing while working overhead, the Buck Featherweight Harness achieves the opposite. Buckingham's ACT (Anti Chafe Technology) Collar™ features folded, stitched, and leather lined shoulder straps to reduce neck chafing while working overhead, creating a much more comfortable day on the job. This harness, through advanced design and materials, we've built one of our lightest harnesses ever.

Features:

- Folded, stitched, and leather lined shoulder straps to reduce neck chafing while working overhead.
- Lightweight – just 3.1 lbs.
- Torso adjustment features no cumbersome web tails.
- 9KV Dielectric Quick Connect chest and leg strap buckles.
- Breakaway lanyard parking attachment.
- Rappelling loops for self-rescue purposes.
- Dorsal web loop for connection purposes.
