PeerCheck™ Kit

SKU: PEERCHECK-2

The new PeerCheck-2™ is now available in a complete kit, featuring an adjustable anchor point (anchor extender) that improves ease of use and keeps the system out of the way of equipment controls. This thoughtful upgrade enhances both mobility and safety during operation. Developed over the course of three years in collaboration with a major utility contractor, the PeerCheck™ system was created in response to a serious incident involving improper lanyard attachment. The result is a streamlined, user-friendly solution designed to promote proper tie-off and reduce risk in elevated work environments.

While there are similar units on the market, PeerCheck™ is the simplest and least expensive unit on the market.

What's out there now:

- Extremely Expensive – other units are in excess of several thousand dollars per truck. One system is \$10,000+ per truck.
- Complex – From Bluetooth connections to software developments to unnecessary features like weather updates, PeerCheck™ is a single feature unit.
- Removal From Field – Other units require the company to take valuable bucket truck assets out of service and send them back to the factory. PeerCheck™ is 100% portable and can be retrofitted onto any bucket truck in the field. PeerCheck™ is easily removed from a truck when the lease is up and put back into service on the new truck.
- Bucket Truck Specific – Other units are only available on certain manufacturers trucks. PeerCheck™ can be used across all truck manufacturers.
- Subscription Based – Other units are subscription based and require a perpetual monthly payment. PeerCheck™ is a onetime cost aside from the annual replacement of a \$5 9 Volt Battery.

It is recommended to add an Obstruction Lanyard to ensure proper use of the device. This device hangs across the bucket and virtually guarantees that the user must clip into the unit.

Obstruction Lanyard
PEERLAN-1

PeerCheck™ Kit Includes:

- PeerCheck™ Unit
- 40" Obstruction Lanyard
- Steel Triple Action Carabiner – 500SS3
- Buckeye Bucket Hook with Tether hole – 2410
