

# BUCKINGHAM ACCESS™ TOWER HARNESS

## Buck Access™ Tower Harness 61992

The Buck Access™ Tower Harness is perfect for a climber who is new to tower fall protection with its user-friendly design and is good for light suspension work. This harness wears like a traditional line belt and features attachments similar to traditional line belts. We recommend the Access™ harness for those who are on their feet and moving around on structures and who may need to occasionally repel or suspend.

### Features:

- Easy to put on by stepping into the belt, pulling the 'Y' over your head and connecting a carabiner to the 5,000 lb. rated loop at the waist.
- Features shoulder pads, and wide leg pads with patented quick connect buckles for added comfort.
- The harness neck features a 'U' designed stitch pattern making the opening wider eliminating neck irritation.
- Buckle in front and back adjust height to create a snug fit.
- Body belt features tool loops, accessory snap, and rings.
- Belt tightens using two friction buckles in front of the work positioning D-Rings.
- Rated to 420 lbs. when used with equivalently rated accessories.
- Available with 4 work positioning D-Rings, **62992**.
