

BUCKSQUEEZE™ LITE

Ergonomic Aluminum / Steel Handle

Provides maximum control and comfort

Nose D-Ring

Interlocks with the rotosnap to create a rigid connection, making ascending/descending easier and more efficient

BuckSqueeze™ Lite 486DK4MA

Over the years Buckingham has designed and manufactured many iterations of a wood pole fall restriction device. First came the original BuckSqueeze™, then the SuperSqueeze™, and finally the EZ Squeeze™, well, we've come full circle. Introducing the BuckSqueeze™ Lite, Buckingham's lightest wood pole fall restriction device to date!

Features & Benefits:

- Buckingham's lightest WPFR device to date! Just 3.5 lbs. Our closest competitor weighs nearly double the weight.
- An Ergonomic aluminum / steel handle that provides maximum control of the device and comfort during long days on the pole.
- An aluminum WebGrab™ that features an extended eye cam efficiently positions the inner strap that creates zero binding and allows for easier replacement of the inner strap.
- Nose D-ring:
 - Constructed of a large easy to connect d-ring section featuring a slotted "nose" that interlocks with the rotosnap to create a rigid connection, which makes ascending and descending the pole easier and more efficient.
 - Large d-ring section creates ease of reconnecting while transitioning, allowing for more efficient transfers. Great for rodeos!
