

GATED HANDLINE CARRIER

EASILY STOW SECONDARY LANYARD & WPFRD TAIL SLACK

Gated Handline Carrier © 2402G

Buckingham's new Gated Handline Carrier takes a great handline carrier (2402) and improved upon it in a number of ways. The Gated Handline Carrier is a polymer handline carrier with a hole to easily secure it to the body belt with a bolt or zip tie, that will straighten when approximately 25 pounds of pressure is applied, allowing the handline to pull free. The Gated Handline Carrier's strength increases by 10 lbs. when the gate is closed. Ideal when using the OX Block™ and related accessories.
