

BUCK EZ SQUEEZE™

EASY ONE-HANDED ADJUSTMENT WITH THE NEW BUCKHORN™ ADJUSTMENT LEVER

**EZ Squeeze™ w/Woven Inner
Strap for Distribution
490W2**

*Max Pole Size 50" Circumference. Weighs 5.1 lbs. User weight capacity 350 lbs.
Made in the USA*

The new EZ Squeeze™ features a new and improved reinforced handle for more rigidity, which makes ascending and descending much easier. The handle position on the outer strap which positions the user's hands in line with each other, provides a more comfortable and normal grip while climbing.

The new & patented Buckhorn™ Adjustment Lever allows the user to increase the length of the outer strap, as well as making slight length adjustments without removing user's weight from the unit. A simple tap of the lever is now all the user needs to make adjustments. The EZ Squeeze™ features

3600 lbf gate rated hardware and can be customized to fit different climbing styles or situations in the field. The modular design makes it easy to change out worn or damaged components or straps in the field.

Meets ASTM F887-16 & EA TS 43-132 Class A1.
